RESPONSE DATE

15 August 2026

SOURCE BRIEF

Client Google Doc (Home through FAQ)

STATUS OF THIS FILE

Implementation response, not a new design proposal

Status key

FIXED

Shipped on findra.ph / main.

PARTIAL

Mostly shipped; remaining gap noted.

RESPONSE

Answered; no extra UI in this round.

OPEN

Not shipped yet, or waiting on listing data.

Home page

Keyword search box

- Not suggestive
- Leads to businesses page only regardless of keyword

FIXED

Home keyword field has no typeahead. Search / Enter goes to `/listings?search=...` (and `category=` when a category is selected). It does not jump straight to a single profile.

Business Category dropdown

Any chosen dropdown leads to the same business page. Showing all businesses instead of the selected category only.

FIXED

Choosing a named category lands on `/listings?category={name}` and the directory filters to that main category only. The empty “Business Category” placeholder does not send a category.

Category tiles

All selection leads to the same business page. Showing all businesses instead of the selected category only.

FIXED

Each tile’s See More goes to `/listings?category={tile name}` using the five locked main categories.

Featured businesses

- Category under tagline must be limited to the 5 main categories only. Creation of new category is not allowed.
- Fix business description preview — text alignment
- Fix business description preview — set allowable character for consistency

FIXED Public featured cards and the listing editor only use: Products & Suppliers; Services & Rentals; Professionals; Freelancers & Creatives; Community & Institutions. Preview text is left-aligned and capped at **120 characters**, word-broken, with a 2-line clamp and ellipsis.

Be Discovered box — adjust text distribution

*When visibility means growth,
we make sure your business gets noticed by the people who matter*

FIXED The box uses this two-line split (break after “growth,”). Words were not changed. CTA: Showcase Your Business → /packages.

Footer

- Make logo bigger and more visible (not same color as the background) — SAME AS OLD WEBSITE
- Social media icons are both pink — please make SAME AS OLD WEBSITE
- Take out “Account Login”

FIXED Public footer uses a larger white Findra wordmark on the green bar. Facebook is brand blue; Instagram is magenta (Facebook findraph, Instagram findra.ph). Footer has no Account Login. Header still has Log In / Register.

Businesses page

Breadcrumb trail

Please make it consistent. The businesses page shows Home → Search Results instead of Home → Businesses.

FIXED Breadcrumb is **Home** → **Businesses**.

Don't show matching businesses when filters are All

Don't show matching businesses when Business Type and/or Business Category is set to All.

FIXED

Results stay hidden until a real filter is active: Business Category $\neq$ All, Sub-Category $\neq$ All, keyword, or Find a Service. Location alone does not reveal the list.

Location search accuracy

Location search is not accurate; all businesses appear regardless of specific location search.

FIXED

Location is disabled until a category / sub-category / service / keyword is chosen. After that it matches the city/area token against listing location. Active state shows "Searching near {place}" with Clear.

Filters

- Remove "Business Type"
- Add "Sub-Category" (below Business Category)
- Change "Business Services" to "Find a Service" and filter the list by the typed keyword
- Remove bullet selection below the Business Services search box
- Move location search here; only apply after the selections above were made

FIXED

Business Type is removed. Sub-Category sits under Business Category. Find a Service is a text field with no chip/radio list. Location sits under those filters and only applies after a need is identified.

Footer

PLEASE APPLY SAME COMMENT FROM HOME

FIXED

Same shared public footer (white logo, brand socials, no Account Login).

Businesses profile page

Remove Business Type

FIXED

Not shown on the public profile.

Change “Business Category” to “Category” only

This should return Business Category / Sub-Category. For Events by Ina this must show:

Category: Services & Rentals / Event Coordination, Venues & Rentals

FIXED Label is **Category**:

PARTIAL / DATA Format is **Category: {main} / {sub1}, {sub2}** when sub-categories are saved. Events by Ina will show that example only after those sub-categories (and hours, if requested) are stored on the listing. Code is ready.

Add Operating Hours below Business Address

FIXED Shown under Business Address when hours exist. Hidden when empty so the profile does not show a blank field. A follow-up can always show “Not provided” if preferred.

Limit “About Us” to 200 characters

FIXED Enforced in the listing editor (maxLength 200 + live counter). Public profile renders the saved text. Older listings saved before the cap may still be longer until they are re-saved.

Limit Our Services to 3 services; maximum 25 characters each

FIXED Enforced in the listing editor. Public profile shows the saved services (max 3 × 25).

Gallery: 6 photos, click + caption (30 characters)

FIXED Max 6 photos. Click opens a lightbox with caption, prev/next, and close. Caption max 30 characters. Empty captions are hidden.

Featured video not YouTube-only; allow upload with preview

FIXED **RESPONSE** Featured video can be a public YouTube URL or one uploaded **MP4 (H.264)** with an HTML5 player (preview + play/controls).

Limit featured video to 1; suggest type and size

FIXED **RESPONSE** Limit is 1 video (YouTube or file, not both). Suggested: MP4 H.264, up to **50 MB, 720p** or smaller, roughly 30–60 seconds.

Limit attachment to 1; suggest company profile / brochure limits

FIXED

RESPONSE

Limit is 1 attachment. Suggested: company profile or brochure as PDF, JPG, or PNG, up to **12 MB**. Word .doc / .docx are not accepted.

Change “Business Location” to “Business Pin Location”

FIXED

Section title is Business Pin Location, with map + Open in Google Maps.

Inquiry form

- Can we see and track the messages between the businesses and their customers?
- Ensure accurate re-directing using the different platforms (e.g. Viber, email)
- Buttons for other platforms appear only if available

PARTIAL

RESPONSE

Inquiries are captured; owners can see their inquiries. A full two-way chat thread UI is not in this round.

FIXED

WhatsApp uses wa.me (PH 09... numbers normalized to +63). Viber uses viber://chat. Email/website/social use saved URLs. Platform buttons render only when that field is filled.

About page

Mission

- Change “Why the platform exists” to “Core Purpose”
- Change the purpose sentence to “To create a simpler, more effective way to discover and showcase businesses in the Philippines.”
- Retain bullet points — too much clutter, low relevance, hard to trust

FIXED

Kicker is CORE PURPOSE. Heading remains “Why Findra exists.” Live copy matches the requested sentence. The three supporting rows are kept.

Brand values — convert to Mission and Vision format

PARTIAL

Copy is locked (No Noise, Structured Discovery, Credibility). Layout is still the shared info-card treatment; matching Mission/Vision image-card chrome is a follow-up.

How it works for seekers

- Step 1 — Retain “Search”; definition “Find businesses that match your needs.”
- Step 2 — Title “Evaluate”; definition “Review services and key details to make an informed choice.”
- Step 3 — Retain “Connect”; definition “Connect with businesses that match your needs.”

FIXED Steps 1 and 2 match.

OPEN Live copy currently says “Connect **to** businesses...”. Approved line is “Connect **with** businesses...”.

How it works for businesses

- Step 1 — “Build Your Profile” / “Add your business, services, and key details.”
- Step 2 — “Your business is found by people based on what you offer and what they’re looking for.”
- Step 3 — “Connect” / “Make it easy for people to get in touch with your business.”

FIXED All three business steps match the requested copy.

Email signup — where do emails get stored and how to access them?

RESPONSE About-page signup posts to `/api/newsletter/subscribe` with source “about-page”. Addresses are stored in Findra’s database and, when a Brevo List ID is set under Admin → Integrations → Brevo, also synced to that list. No public subscriber list.

Packages

Change inclusion points

- Dedicated Business Profile
- Secure Business Dashboard
- SEO-Optimized Business Page
- Built-in Inquiry Form and Direct Contact Tools
- Location-Based Search
- Relevant Category Listing

FIXED These six bullets are the default inclusions on both Basic cards.

Add another basic package, side by side to Early Bird

FIXED Two guest-visible Basic cards: **Basic — Regular Pricing** (₱999/month) and **Basic — Early Bird Offer** (₱799/month), both 6 months locked in. Early Bird can show remaining slots or Sold out. No account required to view or start listing details.

Contact us

Remove “How Can We Help?”

FIXED Removed.

Intro copy

Remove “Have a question about Findra...” but leave “Reach out anytime and we’ll get back to you as soon as possible.”

FIXED Intro is only that remaining sentence.

Where do the messages go and how can we manage it?

RESPONSE The form posts to `/api/inquiries` and then shows `/contact/thank-you`. Messages are stored as inquiries for the Findra team. This round does not add a public ticket portal.

Legal & policies

All good

RESPONSE No visual change. Contact email stays `hello@findra.ph` (not `info@findra.ph`).

FAQ

This section was empty in the Google Doc.

RESPONSE Public FAQ at `/faq` already matches this revision: seekers use Findra free; businesses pay Early Bird ₱799/month or Regular ₱999/month, both locked in for 6 months; guests can view Packages and start a listing before creating an account. No extra FAQ redesign was specified.

Still open

Do not treat these as fully signed off:

1. Full two-way customer–business message threads.
2. About seeker step 3: “Connect with” vs current “Connect to”.
3. Brand Values visual chrome matching Mission/Vision image cards.
4. Listing data for the Events by Ina category/hours example.
5. Optional: always show Operating Hours as “Not provided” when empty.
